Bureau of Land Management U.S. DEPARTMENT OF THE INTERIOR

SELF-SERVICE SIGN SHELVING

A cash award has been presented to Mr. Homer Williamston of the Salem District for his design of a sign dispenser. The unit is inexpensive and easy to construct. Outside measurements are 52" high, 95" wide, and 6" deep. The back is 5/8" plywood, the shelf sides, top, and bottom are 3/4" plywood with adjustable shelf brackets attached to them.

Since its installation in the Salem District, this unit has saved considerable time and effort and provides neat and orderly storage of signs.
